

CERTIFICATE OF COMPLIANCE

Dear Customer,

Safety is the most crucial ingredient of product quality and we want to communicate with you about how we at BC USA are managing this critical responsibility.

Our products adhere to Consumer Product Safety Commission standards.

Our Japanese erasers are 100% made in Japan, the non-PVC materials used contain no lead and no phthalates, we do not paint our erasers.

In addition to the basic standards, they passed much stricter Japanese standards, including passed tests on these subjects: Heavy metal test, hot melt color powder, hardness, 300% elasticity test, power of elasticity, expansibility, tear endurance, rebound power, specific gravity.

In addition to passing the above tests not required under American laws, the following measures are taken in the production of our Japanese erasers:

- 1- Recyclable material, first rule of being environmentally friendly.
- 2- Recyclable or recycled packaging materials used.
- 3- Soy-based environmentally friendly ink used whenever possible.
- 4- Our Japanese erasers are made from styrene resin which make less pollution when burned, uses less energy in production.
- 5- Most lead come from PAINT, we do not paint erasers to add different color, our colorful lead-free products are realized by color powder. Color powders are kneaded into SBS material and melted by heat. We make many parts separately by colors, together they form puzzle erasers.
- 6- Our Japanese erasers are individually packaged in protective bags, made in clean environment with clean equipments, original materials and local Japanese workers.
- 7- Our erasers marked 87.7% in erase test. Every corner of the eraser can be used as real eraser, effective to the last bit, the beauty is more than skin deep.
- 8- There is no compromise for safety, no substitute for quality and no shortcut taken. 100% made in Japan, from original design, all materials, parts, production and logistics.
- 9- Japanese puzzle erasers contain small part, not for sale to children under 8 years of age.

We are constantly working with safety and legal professionals on what types of additional certification or documentation are required, we will address all requirements as they are confirmed.

Thank you.
