

Dear Valued Customer,

At Fascinations, commitment to the safety of our products has always been the number one priority.

For the 20+ years we have manufactured toys, both in the US and Asia, our customers have come to know and trust the Fascinations brand. When consumers purchase a Fascinations product from you, they can be assured that significant investments have been made to ensure the safety and integrity of their purchase.

We not only test products to the ASTM standard, but also to the stricter, EN-71 requirements of the European Union. Fascinations has required third-party safety testing through independent, recognized testing laboratories; the following *minimum* requirements mandated to all Fascinations suppliers:

- A. All products must pass ASTM-F963-07 and be compliant with California Prop. 65 (where applicable).
- B. All products must be Lead compliant as per the CPSIA:
 - Less than 90ppm in surface paint and coatings.
 - Less than 200ppm in accessible substrate material
- C. All products must be Phthalate compliant as per the CPSIA: Less than 0.10% by weight or 1000ppm with regard to DEHP, DBP, DINP, BBP, DIDP and DNOP

Be assured that the products you purchase, as well as the Fascinations products you currently have on your shelves, are fully compliant with the Consumer Product Safety Improvement Act (HR 4040). This includes the requirements of ASTM F963-07, as well as the CPSIA requirements for Lead and Phthalates.

If you have any questions regarding our products, safety testing or manufacturing, please feel free to call: 206-870-3000.

Best wishes,
